SIZE 2 IS MAKING ME GO INSANE

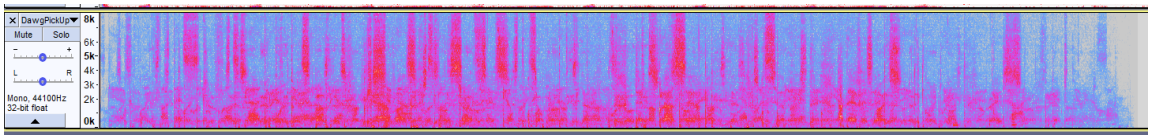
the document

By KOTOB Keeper of the Orange Ball#9252

(most of the obvious stuff here is lifted from [Size²: a tale of two fish])

Mandy Audio

- When the MandaloreGaming plush is held for a minute and a half, a file named "MandyEasterEgg.wav" will start to play. [Link to audio file]
- Transcript: "Hey! Psst! The waterfalls conceal the water-UPS. Agnes gorge trail. **Use your ability**, and find size 2."
- Worth noting: The Action Dawg/Victoria plush plays [ominous whispering] when picked up. However, it doesn't seem to be actual speech in any language, reversing it doesn't do anything, and a cursory spectrogram analysis doesn't immediately reveal anything.

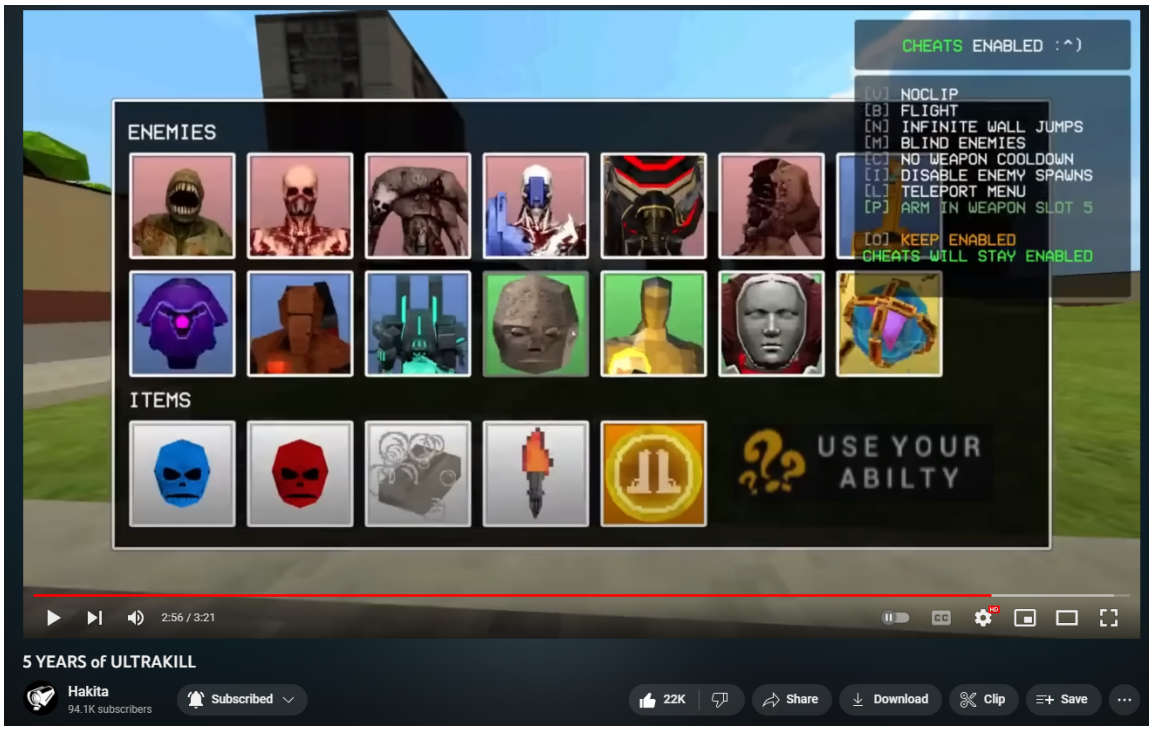


The Developer Museum

- The developer museum holds many secrets that may pertain to the Size 2 mystery. Chief among those is the aforementioned Mandy dialogue.
- The developer museum also includes an aquarium, which holds all the fish the player has collected in 5-S. These fish seem pretty mundane, and all just die when hit, except for the Bomb Fish which explodes, dealing 50 damage.
- It may be worth noting that the movie theater that plays the Developer Video projects directly onto the aquarium if you move the blue skull in the projection box to the second pedestal. Considering the video includes the "USE YOUR ABILITY" text shown below, this might be some type of hint.

Developer Video

- In the “5 Years of Ultrakill” video, H. Dubois#4414 discovered the following text:



- Obviously a direct reference to Mandy’s dialogue, or vice versa.
- Later stated to be just a funny little in-joke that Mandy added, but clearly this is just advanced gaslighting to keep us in the dark. SIZE 2 IS REAL. IT HAS TO BE

“Agnes Gorge Trail”

- Rough coordinates: 48.37879345355097, -120.83774477304699
- Mentioned by Mandy’s plush
- As of now, no Ultrakill discord users have visited the trail. Regardless of the evidence, it’s highly unlikely anything is hidden there, as hiding anything in a national park is illegal.
- Agnes Gorge Trail stands out as being the one part of the Size 2 mystery that doesn’t connect to anything else. It remains… well, not the only loose end, but definitely the *loosest* end.
- Worth noting that the general layout of the area, including the campground and the creek, roughly lines up with the entrance and river in 5-S
-

- 
- 
- on second thought maybe i should go to a psych ward
- One Google Street View location around the trail, dated about 2018(?), has this sign. It remains to be seen if this has any actual significance. “Glacier Peak” is a new term we haven’t heard before.
-

- I have no idea what Crabbycat302#3437 was thinking when they made this, but clearly it was a vision from the gods and is, thus, very important
- 
- It’s unlikely anything’s actually at the trail. Explanation from Loher:

- **Loher (Size 2 Denier)** Today at 12:58 PM
  Actually, seeing as how everyone is saying it's illegal to leave property in a national park, I went and dug up some legislation, just to fact check...

  ```
  36 CFR 2.22(a):
  The following are prohibited:

  (1) Abandoning property.

  (2) Leaving property unattended for longer than 24 hours, except in locations where longer time periods have been designated or in accordance with conditions established by the superintendent.

  (3) Failing to turn in found property to the superintendent as soon as practicable.
  ```

  I doubt that the Ultrakill devs are going to *literally break the law* for a Size 2 ARG
- That being said, MAURICE SPOTTED AT AGNES GORGE TRAIL?!?! SIZE 2 CONFIRMED

-

- Hakita has said he’s never been to Agnes Gorge Trail, but that it “looks nice”. Thus, it’s likely that no actual physical clue is hidden at the trail, but it’s still most likely relevant to the hunt.

“Big Dipper”

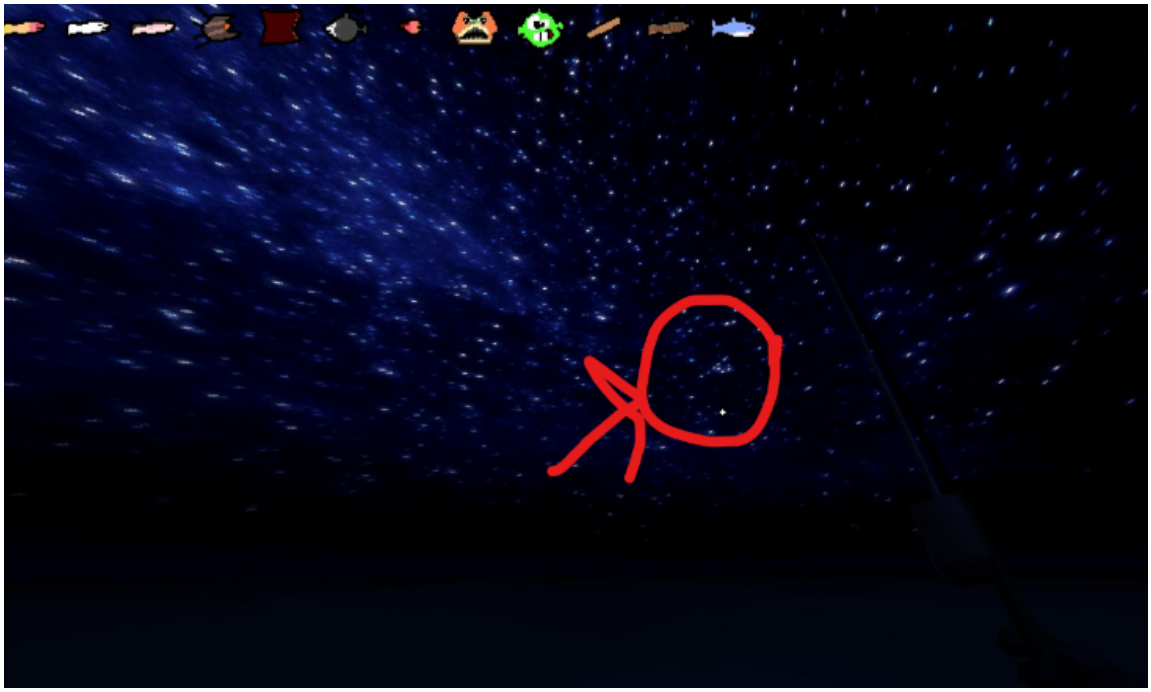
- Uuh here’s the bottle note text for posterity

  “If you can read this, please help. I've been stranded on an

island off the shore for weeks now, and I'm running out of supplies.
I was drawn to ride the waves in hopes of finding the legendary size 2 fish. I had combed every inch of land and lake with no avail.
I deduced they must exist far out at sea, so I set sail with a month’s worth of cooked fish, but the waves sank my ship before I could find anything. You're my last hope.
Set sail towards the big dipper, you will find me on an island there. Bring me more fish and then leave so I may continue my search.

THE SIZE 2 FISH IS MINE.”

- The bottle note in 5-S mentions an island in the direction of the Big Dipper. While the Big Dipper does prominently appear on the night skybox, the skybox is always rotating, so you can’t exactly follow it. If you do attempt to follow it, you’ll just be looped back in the direction of the island.



- (image of the Big Dipper in the night skybox)
- This skybox has been used in some other levels, notably in the night version of 4-2, however it’s always ROTATING so you can’t find anything. As far as I can tell, this skybox has been in the game since Greed-ish, so unfortunately it (probably) doesn’t have any secrets.

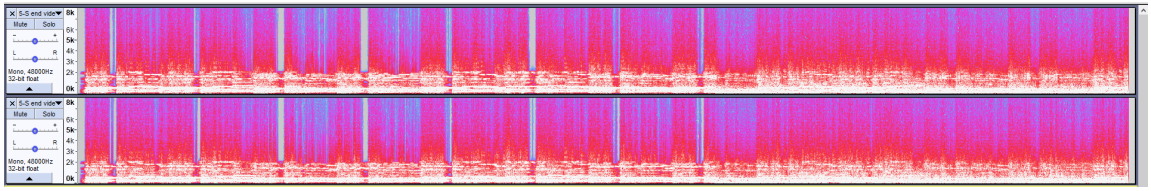
- Big Dipper as it appears in 4-2 Night.

- (Here's the full skybox image file. Worth noting: there are two versions of it in the game files, this is the slightly lighter one titled "nightsky 1.png")
- It's worth noting that the Big Dipper is commonly used to find the north star (aka Polaris), which is (as the name implies) used for finding which direction north is. Thus, this may hint that we have to travel northwards from some point.
- However, Agnes Gorge Trail doesn't seem to have much immediately north of it, besides a campsite that seems pretty unimportant.

5-S Video File

- At the end of 5-S, you can see a video file, featuring V1 congratulating you and an ear-splittingly loud version of 2-S' music. [Link to video]

- That audio was annoying enough to make me think it had some importance, but alas the spectrogram analysis turned up nothing, and I just ended up with minor tinnitus at the end.



“Holy Water”

- **WARNING: THIS IS DATAMINED CONTENT**
- The game references different types of water, including one type known as “holy water” that seems to have a green designation. While this might be important, I think it might be what the Lower Bloods ended up being, as I can’t find the lower bloods anywhere else in that list.

The Terminals

- Inside the well in 5-S, there are various doodads and terminals with different things on them.

- 
- Approximate deciphering of the terminals (slightly edited from Size^2 doc):

```
Scanning the water...
Fishe: 324
Water: 3924
Salt(?): Yes

Scanning size of fishe...
...

Average fishe size 1.0000

FISHE

PITR
(1)

TROUT
(1)

CAT (or) FSF
(1)

SCANNING FOR SIZE 2... FAIL
```

- The bottom-right terminal shows a radar scan with a cat (PITR?), and two of what are either submarines or really fucked up fishes.
- We tried feeding PITR trout. It did not work.
- Some people have said that the bottom left terminal roughly lines up with the Agnes Gorge Trail path on Google Maps. I don't see it, but maybe I'm just blind.
- This thingy here buzzes in a pattern, however, the pattern doesn't seem to be anything close to Morse code, so who knows what this means, if anything.
-

- That machine to the right of that image always plays some "printing" noise. Is it still active, doing something? Who knows?
- There's some sort of transparent box at the back of the room, and through it, you can see the rest of the level. I'm going to assume this is some sort of weird transparency bug, and not anything relevant to the Size 2 mystery.

"Oil Floats On Water"

- Ultrakill Discord user Crabbycat302#3437 discovered that bait/fish thrown in the oil pan will float when in contact with water, or air(?). However, while oiled up bait/fish can reach the top of the waterfall, nothing happens when they do. [Video demonstration.]

Size 2 Thread

- After the closure of the Solver Squad channel in the Ultrakill discord, a Size 2 thread was created in the Ultraspoilers channel. However, every day, the slowmode has increased on the channel. As of March 23rd, 2023, the slowmode is 5 minutes per message.
- CLEARLY these PLEBEIAN MODERATORS are trying to DISTRACT and CONFUSE us so we will NEVER find out the TRUTH behind the SIZE 2 MYSTERY. THEIR EVIL EFFORTS WILL NOT PREVAIL! THE SHEER WILL AND COMMITMENT OF THE SIZE 2 FISHERMEN WILL PREVAIL!!!

The Waterfall

- *I can’t currently collect images, i’ll make this more interesting soon I swear*
- 5-S contains a waterfall. Obviously, this is very significant due to Mandy’s easter egg dialogue.
- When noclipped up to, there’s a PITR head that just says “it’s a living”.
- Using slope jank, Ultrakill discord user <agh find the username> managed to reach the top of the waterfall without using cheats, however the result was the same.
- Feeding that PITR didn’t seem to do anything.
